

# MaeBara Labs

## Your Technical Partner Beyond Limits

MaeBara Labs is the premier AI outsourcing and application development brand of **MaeBara Corp.** We specialize in everything from custom AI modeling across various industries to practical, high-performance full-stack development, spearheading the digital transformation (DX) of your business.

### Why Partner with MaeBara Labs?

1. **Proven Technical Pedigree**

We apply the rigorous technical management systems of MaeBara Corp. to every project, ensuring overwhelming quality and reliable performance.

2. **Domain-Agnostic Adaptability**

We don't limit ourselves to specific sectors. Whether it's construction, distribution, manufacturing, or finance, we flexibly apply the optimal tech stack tailored to your unique business environment.

3. **Execution & Strategic Aftercare**

We go beyond simple delivery. We act as your long-term technical partner, ensuring your services are stable and successful in the market through dedicated operational support.

### Core AI Solutions (The "True" Series)

#### 1. True Draft: AI Universal Document Auditor

- **Definition:** AI Universal Document Auditor
- **Key Feature:** Vision AI-based document verification system.
- **Specialty:** Goes beyond simple text matching to analyze the integrity of tables, drawings, and numerical data. It automatically audits standardized documents across all industries, reducing human error to near zero.

#### 2. True Predict: AI Demand & Logistics Forecaster

- **Definition:** AI Demand & Logistics Forecaster
- **Key Feature:** An AI prediction system combining global trends with supply chain variables.
- **Specialty:** Analyzes complex variables (oil prices, weather, market trends, etc.) in manufacturing and logistics to forecast future demand and preemptively manage inventory and logistics risks.

#### 3. True Persona: Hyper-Personalization Engine

- **Definition:** Hyper-Personalization Engine
- **Key Feature:** Providing 1:1 tailored experiences through behavioral and psychological analysis.
- **Specialty:** Analyzes real-time customer data in e-commerce, education, and finance to maximize conversion rates and detect churn signals in advance.

#### 4. True Guard: AI Digital Safety & Security

- **Definition:** AI Digital Safety & Security
- **Key Feature:** Real-time detection of voice phishing, smishing, and deepfake fraud.
- **Specialty:** A security net for financial institutions and public agencies where AI captures subtle artificial features in audio and video to protect assets and trust from digital crimes.

#### 5. True Forge: AI Content Generation Pipeline

- **Definition:** AI Content Generation Pipeline
- **Key Feature:** An infinite generation system for game assets and visual resources.
- **Specialty:** Automatically generates 3D models, textures, and multilingual scenarios, reducing production costs by 90% while maintaining high commercial quality.

#### 6. True Agent: AI Autonomous Task Engine

- **Definition:** AI Autonomous Task Engine
- **Key Feature:** An AI employee that executes tasks beyond just reporting.
- **Specialty:** Communicates directly with internal enterprise systems (ERP, CRM, Email) to autonomously complete everything from simple administrative tasks to complex schedule coordination.

### Featured Applications

#### Pure LLM: The Purest AI Integration for Shopify

- **Service Name:** The Purest AI Integration for Shopify
- **Description:** Direct integration of the latest Large Language Models (LLMs) like GPT and Claude into Shopify store admin pages without any coding. Store owners can use their own API keys to embed AI features in the most economical and pure form.

### Business Inquiry & Collaboration

MaeBara Labs translates your business logic into AI-driven code to build apps that generate actual revenue.
